

NOSHOK

Press Release

FOR IMMEDIATE RELEASE

NOSHOK LEVEL MEASUREMENT SOLUTIONS

Berea, Ohio (March 30, 2011) NOSHOK offers a wide variety of level measurement instrumentation to suit multiple application requirements.

Backed by a 3 year warranty, NOSHOK's highly reliable submersible level transmitters feature an advanced diffused semi-conductor and sputtered thin film sensor for maximum stability. They are also shock resistant and extremely stable over long periods of time.

612 Series Industrial Submersible Level Transmitters

- Ranges from 0 inH₂O to 50 inH₂O through 0 psi to 1,000 psi
- Corrosion resistant 316L stainless steel construction
- Reverse polarity protection, short circuit protection & nosecone are standard

627 Series Intrinsically Safe Submersible Liquid Level Transmitters for Hazardous Locations

- Accuracy to $\pm 0.25\%$ Full Scale (Best Fit Straight Line); $\pm 0.125\%$ Full Scale optional for ranges ≥ 150 inH₂O only
- Ranges from 0 inH₂O to 50 inH₂O through 0 psi to 350 psi
- IS / I,II,III / 1 / ABCDEFG - I / 0 / AEx ia / IIC - DIP / II,III / 2 / FG - NI / 1 / 2 / ABCD

755/756 Series High Performance Digital Pressure Transmitters

- Features digital electronics that provide outstanding performance and value
- Maximum flexibility with up to 20:1 span turn down and -2.5 to 99% zero adjustment
- 32 point output scaling for non-linear tanks
- Built-in process temperature display & selectable process digital filtering

Level Control:
Externally mounted
(with front flush diaphragm)

Level Control:
Combined pressure and head pressure are measured by two externally mounted pressure transducers. The two signals are analyzed and the differential is calculated by a PLC or suitable signal converter.

NOSHOK, Inc. is a leading supplier of pressure, level, temperature and force measurement instrumentation, along with needle & manifold valves, serving major industries around the world. Products include pressure gauges, pressure and temperature transmitters, transducers & indicators, pressure switches, needle valves, manifold valves, pressure snubbers, bimetal thermometers, force measurement sensors and diaphragm seals. These products meet and exceed the application requirements of OEM's and industrial users seeking exceptional quality, reliability and value.
